

MIT-WPU Career Counselling Session

In an ever-evolving world with niche professions sprouting up daily, selecting one's career has become a dreaded and challenging task for today's youth. To assist the students of the Bishop's Junior College with this taxing decision, the management of Maharashtra Institute of Technology-World Peace University visited the school for a career-counselling session.

On Tuesday, 24th January 2023, the Lorna Roberts Hall saw the Bishop's Junior College seated to obtain advice from the seasoned professionals at the MIT, Pune regarding their higher education and subsequent employment opportunities. Ms. M. Hora, the Dean of the Junior College, presented the university's director- Mr. Praveen Patil, an alumnus of the Bishop's School, who introduced his colleagues one at a time. Each one of them gave the audience a detailed account of their outlook on the modern job scene.

The Deans of countless branches of the university such as engineering, health sciences, business, etc. were present. Each of them spoke about lucrative and cutting-edge potential jobs in their respective fields, making sure to give equal importance to the science, commerce and arts streams. These experienced speakers helped to dismiss the stigma that non-science students had limited career paths. They also comforted the students by indicating that it is normal to be confused because of the abundance of options present today. Soon after, the students were separated stream-wise for a more focused and personal Question and Answer session.

After fielding questions for a little longer, the Junior College bid farewell to the honourable guests, no doubt leaving with valuable newfound knowledge.
