

THE BISHOP'S CO-ED SCHOOL, UNDRI

JUNIOR COLLEGE

Report on Guest Lecture

There has been a surge in the usage of digital modes of payment in recent years. This gained further momentum during the Covid-19 induced lockdowns. While enhancing customer convenience, it also furthered the national objective of financial inclusion. While the speed and ease of financial transactions have improved, the number of frauds reported in retail financial transactions has also gone up. Fraudsters have been using innovative methods to defraud the common and gullible people of their hard-earned money. The new entrants in the use of digital platforms who are not entirely familiar with the techno-financial ecosystem are the victims of cybercrime. There is a need for keeping one's personal information, particularly financial information, confidential always. It is imperative to be aware of unknown calls/emails/messages, practice due diligence while performing financial transactions, and change the secure credentials/passwords from time to time.

On the aforementioned line, the talk was organized by ***The Bishop's Co-Ed School Undri for the students of class XI and XII on 18 October 2022 using MS Teams platform.***

The session commenced with an introduction to the speakers. The speakers, thereafter shared their valuable inputs on cybercrime issues such as phishing, the new launch of 5-G cards with potential cyber harm, and some information on harmful effects caused due to charging portals in airports and local places. The program was well attended by Grade XI and XII students as well as the supporting staff members. The super interactive MCQ round conducted by Mr. Narayan was the cynosure of the event. The event concluded with a doubt-solving session and a vote of thanks.
