

## **THE BISHOPS CO-ED SCHOOL, UNDRI**

### **REPORT ON EXPERIENTIAL LEARNING FOR CLASS III**

**"Tell me and I forget, teach me and I may remember, involve me and I shall learn."**

**-Confucius**

Experiential learning is a philosophy and methodology in which educators purposefully engage with students in a direct experience and focused reflection in order to increase knowledge, develop skills and clarify values.

An interesting session of experiential activity was organized by the 'SAKAL TIMES' under the supervision of Miss. Amruta Kamble on 2<sup>nd</sup> of December 2022 at **THE BISHOP'S CO-ED SCHOOL, UNDRI** for the students of grade 3.

The Science experiential Model Kit of 'a Skeleton' was distributed to the students. A demonstration under the guidance of the resource person, the class co-ordinator & class teachers encouraged students to learn different types of bones, their functions and movements in the body. The students were provided with the pieces of images of the skeleton which they had to fix together. The session was both interactive as well as informative and every student found it interesting and productive.
