

THE BISHOP'S CO-ED SCHOOL, UNDRI

**A REPORT ON EXPERIENTIAL LEARNING ACTIVITY -
BLOWING WINDMILL MAKING**

" GIVE THE PUPILS SOMETHING TO DO, NOT SOMETHING TO LEARN; AND THE DOING IS OF SUCH A NATURE AS TO DEMAND THINKING; LEARNING NATURALLY RESULTS."

“Experiential learning is the application of theory and academic content to real- world experiences, either within the classroom or online. If learning is imposed by hours of worksheets or computer curricula, children are separated from rich stimuli that inspire them to connect ideas and to develop meaningful competence beyond test readiness; real experiences help them build understanding as well as incorporate new information. The Bishop’s CO-ED School, Undri held an experimental activity for class 5 on the 23rd of September 2022.

The session was conducted by the resource person from the Experiential Learning Enterprise (ELE), Ms Amruta Kamble and her team. The resource personnel guided the students stepwise to make the Windmills. The enthusiasm of the students was seen during the activity as they made the windmills under the guidance of their mentors. We could see the eagerness of the students to learn this activity of making blowing windmills. It was a great pleasure to see the children blowing the windmills. Students were also excited to see the lights glow after blowing the windmill. It was an interesting and exciting activity.

We would like to thank our Principal Mr. J. Luke and our Supervisor Mrs. M. Fernandes for their guidance and support in organising this activity. We would also like to thank all our teachers for their assistance in conducting this activity successfully.

Report By:

Mrs Rebecca Benjamin

Children totally engrossed in the activity

Active involvement of students

Creative and fun filled activity
