

THE BISHOP'S CO-ED SCHOOL, UNDRI
REPORT ON THE ELE ACTIVITY PROGRAMME
2023-2024 FOR CLASS 2

***"Give the students something to do, not something to learn;
and the doing is of such a nature as to demand thinking;
learning naturally results."***

The Experiential Learning Enterprises programme was conducted by Mr. Suyash Dake and Ms. Nikita Kulkarni for class 2. The activity was held on the 8th of December 2023. Almost a hundred excited students participated in the making of the stethoscope.

The instructors explained to the students the different parts of a stethoscope and its purpose by the doctors across the world. The packets that contained the materials to put a stethoscope together were distributed to all the students. Step by step instructions were provided to make a stethoscope. The students actively engaged themselves in the making of their stethoscopes. This gave the students a hands-on experience to go beyond their horizon and create something new. The cooperation and discipline reflected between the students and mentors made this activity a fun-filled experience. The children were fascinated by the activity.

The children were amazed to learn about a medical apparatus that they never gave a second thought to and went back home enlightened. They were exhilarated when they were asked to take their stethoscopes home.

Mesmerised by the magic of Science

Our young Doctors

The future of medicine starts right here

To God Be The Glory
