

THE BISHOP'S CO-ED SCHOOL, UNDRI
REPORT ON THE EXPERIENTIAL LEARNING ACTIVITY
PROGRAMME
2023-2024 FOR CLASS 2

"Learning is the product of the activity of learners."

Experiential Learning is the process of learning by doing. By engaging students in hands-on experiences and reflection, they can better connect theories and knowledge learned in the classroom to real-world situations.

The experiential learning activities were held on the 31st of January and the 6th of February 2024 for the students of class 2. The students were excited to make their **MOVING CAR** and **ART ON JUTE BAG** on the corresponding days.

The instructors not only explained to the students what they would be doing but also gave them scientific knowledge about the materials used. The packets that contained the materials were distributed to all the students. Students were guided as to how to go about doing the activity and were encouraged to explore. This gave the students a hands-on experience to go beyond their horizons and create something new. The cooperation and discipline during the activities reflected the joy of learning and bound the students and mentors together to make these activities a fruitful experience.

The children were amazed to learn how a **magnet** worked and how a plant product called **jute** is used to make different things and save our environment. They were exhilarated when they were asked to take their 'magnetic car' and 'shopping bag' home. The students returned to their classes, proudly displaying their work with joy.

Mesmerised by the magic of learning by doing.

"LEARNING IS GOOD. DOING IS BETTER"
