"Rewind and Reuse"

REPORT ON THE MIDDLE SCHOOL - BEST OUT OF WASTE ACTIVITY

CLASSES: VI, VII & VIII (BAGLESS DAY)

"A society is defined not only by what it creates, but by what it refuses to destroy." – John Sawhill

The students of classes VI, VII and VIII participated in the "Best Out Of Waste" activity which was conducted on 9th December, 2023 as part of the bagless day. This environmental friendly activity was conducted in their respective classes.

The main objective of this activity was to inculcate in the students love for the environment and the importance of sustainability. The students used their creativity and imagination to create useful objects that can be used in daily life.

The students of class VI made tea coasters and a photo frame from old cardboards and newspapers. It was delightful to see cardboards transforming into colourful tea coasters and beautiful photo frames. The students of classes VII and VIII made planters from coconut shells and clay. They also made pen holders from old plastic bottles. These useful objects were painted beautifully and displayed in the class. One could see the enthusiasm of the students while creating these impressive and recyclable items. The students also watched a video which showed them different ways of reusing plastic bottles.

This activity aimed to imbibe in the young minds the values of preserving the environment and to educate them to use waste for different purposes. It developed a sense of love for nature and also brought about awareness of reducing waste and saving our planet.

The 'Best Out Of Waste' activity also helped the students to use critical thinking to manage waste by reducing, reusing and recycling material. The day was full

of fun and enthusiasm and the students participated wholeheartedly to display their creative skills and innovative ideas.
