

THE BISHOP'S SCHOOL, CAMP

Junior School

Experiential Learning Activity

2022-2023

Date– 12th and 13th July, 2022

Numerous activities have been planned for the students of The Bishop's School, Camp in collaboration with Experiential Learning Enterprises. Our focus being application-based learning which helps in better understanding of concepts and engaging children creatively.

Class-1

A story about a bug was narrated to the children. To provoke their imagination skills, they were told to visualise a bug and design it with the available materials. The design process was to enhance their visualisation and fine motor skills. The children designed a bug and created a colourful head gear.

Class-2

The students received a kit to prepare a kaleidoscope; an optical toy that is used to create multiple reflection to see beautiful patterns. Three mirrors needed to be fit to make a triangle with angles of 60 degrees each. This equilateral triangle of mirrors produces symmetrical patterns. The objective of this experiment was to explain the concept of

Class-3

The children received a kit to build a stethoscope. They made a diaphragm using a balloon. They were explained the utility of the hollow pipe. The children conducted the experiment of listening to the sound of human body. The process included discussing, analysing and reflecting on their understanding.

Class-4

The students received a kit to design a pouch. The activity included a tactile experience to create thumb impressions on the pouch, using acrylic paint. These impressions were further enhanced into forms, patterns and figures using a black marker. The objective of this activity was to magnify the children's imagination skills and creativity.

Class-5

The students made Warli paintings. They were told about the origin of tribal art and its significance. They illustrated different figurines. The objective was to introduce the children to the native art form of Maharashtra.

Ms. N. Mehta

Assistant teacher – Junior School.
