STORY TELLING

PRE-PRIMARY

**"THE BEST WAY TO TEACH CHILDREN IS
BY TELLING A STORY"**

Story telling is a great skill to teach the little children. Reading and telling a story promotes brain development and imagination in children. The little minds are always in awe of fairy tales and letting their imaginations always run wild. Stories teach the children about language and emotion and instills a love of reading in them. It helps the children to value books and sparks their imagination and also stimulates curiosity and communication skills. The children learn the difference between 'real' and 'make-believe'.

We were fortunate to have with us multi-talented resource person session for the Pre-Primary Section

Mrs. Sharanya Sriram, a who conducted the story telling in the month of March 2022.

The Story Telling Session was conducted on the virtual platform. The children eagerly waited for the session to start. Ma'am made the session interesting by singing to them nursery rhymes. Ma'am then conducted a puzzle activity and thereafter the story of "Leo the Lion" was narrated to them with the help of hand puppets. The children thoroughly enjoyed themselves and couldn't help themselves as they also sang along with Mrs. Sriram.

Ma'am beautifully interacted with the children with the help of voice modulation and with the lovely creative hand puppets which she used. The children looked very happy and excited and enjoyed the story telling session thoroughly.

Overall, this session helped the little stars of Bishop's to improve their focus, oral fluency, and social skills.
