

THE BISHOP'S SCHOOL, CAMP, PUNE
Junior Section
ECO CLUB REPORT
CLASSES 1 – 5

The Eco club initiative had taken off with a bang, and the kids were thrilled to be part of this unique and meaningful Club. With an aim to learn about medicinal plants, conservation of natural resources, and saving water and electricity, the boys were all geared up for a fun and interactive learning experience.

To start off the club activity we had a discussion on a number of medicinal plants. They learned about the properties of various medicinal leaves and how these could be used to treat common ailments like cold, cough, indigestion etc. As part of the activity the boys made charts on 'Medicinal leaves and their uses'.

The next activity was centred around saving water and electricity. The boys were taught about the need to conserve these resources and how even small actions like turning off the tap while brushing could go a long way in conserving water. They were also shown various ways to save

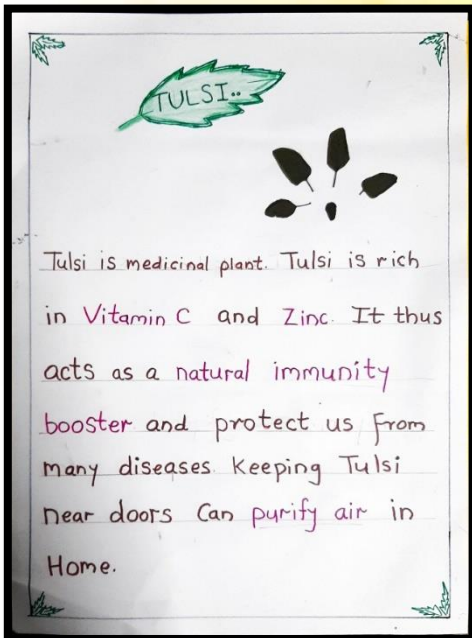

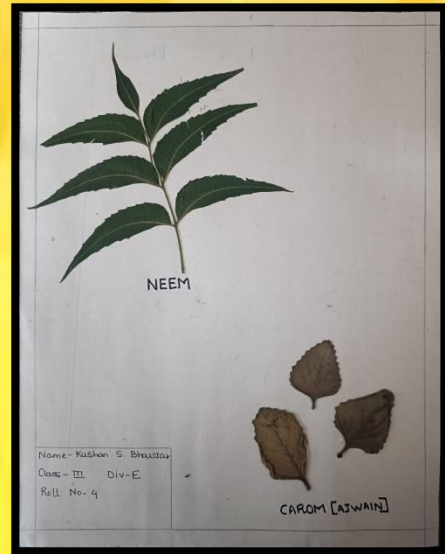

electricity, such as turning off lights and appliances when not in use. The boys used their creativity and imagination to depict the topic through art.

The boys had not only learned a great deal about the importance of conservation, but they had also developed a greater appreciation for the natural world around them 'Pledging to save the

Environment'. They realized that even small actions could make a big difference in preserving our planet and making the world a better place.

In conclusion, young environmental champions, remember that our eco club's journey doesn't end here. Your dedication to protecting our planet will continue to thrive, and together, we will make a lasting impact for a greener, healthier world.

SAVE WATER. SAVE EARTH.

Water is a precious resource. It is also called wet wealth. We need to be careful in the way we use it.

Ways we can save water.

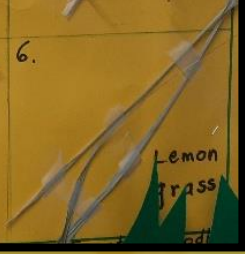

- Take shorter showers.
- Turn off water while brushing your teeth.
- Check faucets and pipes for leaks.
- Use your washing machine always for full loads.
- Practice rainwater harvesting.

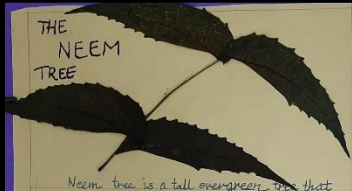

Ways to save electricity.

- Switch off lights and fans when not in use.
- Reduce appliance use.
- Use renewable sources of energy like solar and wind energy.

Some medicinal plants

1. Mint (pudina) 	2. Neem 	3. ginger plant 
4. Basil 	5. Tulsi 	6. Aloe vera 
		Lemon grass 

THE NEEM TREE

Neem tree is a tall evergreen tree that can grow upto 15-20 meters in height. Neem tree has small, white flowers and produce green, oval-shaped fruits. Neem leaves, bark and seeds have medicinal properties that are used in making various medicines. It helps in treating skin problems, dental issues and stomach ailments. Neem is also used as an ecofriendly pesticide in agriculture. It provides shade and helps in reducing air pollution by absorbing harmful gases. It is also known as 'Aardirachta India' in scientific terms. It can survive in extreme heat. It is a very useful plant found in India.

TULSI - A MEDICINAL PLANT

Tulsi is a sacred plant. It is also known as Holy Basil. We can have either the Rama Tulsi or the Shyama Tulsi at home. It helps to reduce cold, cough and fever. Tulsi leaves helps in reducing the stress levels in our body. Holy Basil is good for our skin too.

Pledge to save the earth

- Do not cut trees
- Use EV instead of petrol or Diesel vehicles
- Do not waste water
- Do not pollute rivers. Rivers are a source of water.

TOOTHACHE PLANT

Flower

Cut flower

Small Part of flower which gives "RELIEF" from PAIN IN TOOTH (TOOTHACHE) so it is called "Toothache plant."

ANSHAY PALLAR 10

JUSTICIA ADHATODA ADULSA PLANT

LEAF JUICE OF THE ADULSA PLANT GIVEN AS MEDICINE FOR COUGH
