

THE BISHOP'S SCHOOL, CAMP **REPORT ON EXPERIENTIAL LEARNING – CLASS 7**

“ If a child can't learn the way we teach,
maybe we should teach the way they learn.”

-Ignacio Estrada

Experiential learning is the process of learning by doing. It is designed for students to enhance their knowledge and skills.

On 20th January, an experiential learning activity was organized by The Bishop's School, Camp for Class 7. The activity was making a 'Pen stand'. The students received a kit to make and decorate the same. It is easy to make a pen stand and the best part is decorating it. It has no definite rules, it's all about the imagination and creativity. So, we thought of decorating our pen stand like our children's favourite superheroes. Their mysterious aura, intelligence, and physical strength make children want to be like them.

The main objective of this activity was to teach the children the art of making useful items, keep their writing instruments upright, manage stationary items and organize their study table.

The children showcased their creative skills and the result was amazing. This fun-filled activity witnessed an enthusiastic participation by all students.

Students of Class 7 thoroughly enjoyed performing this activity. The cooperation, discipline and imagination reflected between the students and mentors made this activity a great success.
