

**THE BISHOP'S SCHOOL, CAMP**  
**JUNIOR SCHOOL- SECOND SESSION**  
**A REPORT ON – THE ECO CLUB**

**Title of the Activity:** Introduction to the ECO club and art work on saving earth.

**Objective:** To create environmental awareness among the students for improvement and to inculcate the culture of eco-friendliness and environmental conservation among them.

**Context:** Started the club activity by introducing what the ECO club is all about and discussed all the possible ways that we can adopt to save our environment and make it a better place to live in.

The teachers-in-charge of the Eco Club are Mrs. Varsha Deshmukh, Mrs. Bhavna Gharodiya and Ms. Veronica Jayasilan. We carried out two activities, as reported below:

We began discussing the reasons for air, water, soil, and noise pollution and the bad effects of it on mother nature, human beings, animals and birds around us.

We also discussed how each one of us can contribute by making small changes to save our earth in small possible ways. For example: use bicycles or walk as much as possible instead of using bikes and cars for small purposes like going to the market etc, stop using plastic bags and use paper or cloth bags, separate dry and wet garbage so it's easy for disposal, etc. The first activity given to them was to do a drawing how one can save nature/environment with the ideas discussed in the introduction. Children drew and coloured different creative images and were able to understand how they can make a difference by creating awareness about the significance of the saving our mother nature for a clean, green and healthy environment.
