

THE BISHOP'S SCHOOL, CAMP

EXPERIENTIAL LEARNING ACTIVITY – CLASS 8

On Friday, 20th January, 2023 – Class VIII an experiential learning activity was organized by The Bishop's School, Camp. During the activity period the students were given an activity kit to make a *Folder*.

The kit contained a cardboard folder, colourful paper strips, file cover, a file holder clip and a name tag. The classroom had an eagerly awaited students, bubbling with energy to display their creative best!

The folder had to be decorated with the colourful strips of paper arranged in a sunset theme. After covering the folder, the students thoroughly enjoyed the art of cutting the strips into waves and then arranging them. Timely feedback was provided to those who were unable to arrange them in colour coordinated manner.

The students learned the self-management skills necessary to work successfully. Many of them displayed their creative skills at its best. Some adorned the sunset theme decorations with their own creative inputs. This activity helped in creating interest in students to learn a new technique or medium in Art and enhance their creativity.

The children learnt how to decorate and make folder using the basic materials. Students were able given wings to their imagination,

creating a beautiful Folder, which many insisted on keeping their progress report cards and other important documents in the future. It was indeed truly a vibgyor of colours that made a simple object into a beautiful painting. "Learning is enhanced when students are given the opportunity to operate outside of their own perceived comfort zones."

"I hear I forget.

I see I learn.

I do I understand".

Mrs. Cecelia Mahudkar
