

The Bishop's School, Camp  
Pre- Primary Section  
A Report on World Earth Day

***THE EARTH IS A FINE PLACE AND WORTH CARING FOR.***

**Earth Day** is a global event that aims to raise awareness and appreciation for the environment. It is celebrated annually on 22nd April. The theme for 2023 is **'Invest in our Planet'**. In line with this, The Bishop's School Pre-Primary Section conducted creative virtual activities on 20th April to encourage children to play their part in making the planet a better and beautiful place. They were all dressed in blue or green t-shirts showcasing their love for the planet.

The children were shown a Power Point Presentation to remind them of some significant contributions that they could make to keep the Earth green. They learnt about the importance of preserving and conserving mother Earth through the 'Reduce, Reuse, Recycle' concept.

Our Nursery students were engaged in a paper crushing and sticking craft activity. It was a pleasure to see their enthusiastic participation!

The Lower and Upper Kindergarten students were educated on the need to plant more trees. To put their knowledge into action, each student planted a seed in a pot or container and pledged to water it daily until it grows. The children participated in the activity with zeal.

***“LOVE THE EARTH AS YOU WOULD LOVE YOURSELF!”***

The initiative ignited a passion for environmental conservation in these young minds, empowering them with valuable knowledge and skills. The day's activities were successful, with children committed to taking better care of their environment and making a positive impact.

***'EVERY DAY, EARTH DAY'***
